

MORE ANTIETCH®

Protection for marble and *natural stone*

A clear UV-cured coating that keeps your stone's own finish and prevents etching and staining. With a lifetime warranty.

WHAT IT IS

A clear coating that keeps *the stone's own finish*

MORE AntiEtch® is a clear UV-cured coating for marble and natural stone. It is applied and cured with UV light on site.

It's an invisible UV-cured coating, so the colour and veining show through as they should, and the stone keeps its own finish. Once cured, it prevents etching and staining: spills wipe away instead of soaking into the stone.

Clear, UV-cured on site

Keeps the stone's own finish

Prevents etching and staining

HYATT STRATFORD · PROTECTED VANITY

Protected for life.

Every MORE AntiEtch® installation comes with a lifetime warranty. Remember to register your warranty.

"Anti-Etch Test: Protecting Marble from Vinegar, Wine, and Soy Sauce Stains & Etching"

youtube.com/watch?v=T40zgDt8IMI

A close-up photograph of a dark, veined marble surface. In the upper right corner, a glass of water is visible, with light reflecting off the surface of the water and the glass. The overall tone is dark and elegant.

BENEFITS

Marble that stays beautiful, *without the worry*

No more etching

Lemon juice, wine, coffee, vinegar and cleaning products can't dull or mark the surface.

Stain protection

Spills wipe away instead of soaking into the stone.

Easy care, never resealed

It never needs resealing. Just clean with water or any everyday non-abrasive cleaner.

Looks like natural stone

It's an invisible UV-cured coating, so the stone keeps its own finish and the colour and veining show through as they should.

Fast, on-site application

The coating is cured with UV light on site. A kitchen takes 1–2 days, and a hotel room is back in use the same day.

A lifetime warranty

You only invest once. Register your warranty to make sure you're covered.

FOR HOMES

FOR HOMES

Enjoy your marble *every day*

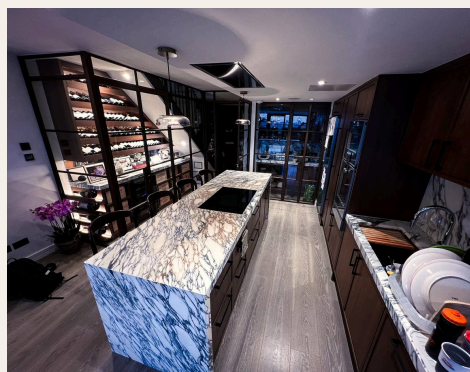

Kitchen worktops, islands, vanities and tables. Enjoy your marble every day without worrying about every glass of wine or squeeze of lemon.

Applied and UV-cured on site, with a lifetime warranty once registered.

TIMING

A kitchen takes 1–2 days

— KITCHEN WORKTOPS · ISLANDS · VANITIES · TABLES

HOMES · ON SITE

FOR HOTELS & COMMERCIAL

FOR HOTELS & COMMERCIAL

Protection that keeps *rooms open*

Guest-room vanities, bars, reception desks and restaurant tables. It protects your stone, with no closures for re-polishing.

Applied and UV-cured on site, with a lifetime warranty once registered.
